Synthetic Risk Reward Indicator

Sub-funds of the category 4 were medium volatile in the past. Volatility shows how much did the asset value per unit fluctuate upwards and downwards in the past. Considering the historical data on volatility, the sub-fund's asset units of category 4 may be exposed to medium price fluctuations. Mixed portfolio composition enables higher exposure to debt investments, which increases the credit risk. In case that the issuer becomes insolvent or finds himself in economic problems it can happen that the debtor does not settle his obligations towards the sub-fund in total or in time.

Synthetic Risk Reward Indicator

◀ Lower risk – Typically lower rewards ▶						
1	2	3	4	5	6	7
▶ Higher risk - Typically Higher rewards ▶						

The risk category was calculated using historical volatility data, based upon the methods set by European Union rules. The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile of this fund. Volatility is influenced by changes in the stock market prices, currencies and interest rates which can be affected unpredictably by diverse factors including political and economic events. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. The lowest category of risk does not mean that the investment is risk-free. On the basis of price fluctuations measured in the past, the fund has been classified in the category 6. The Fund has been classified in the category 6 as it invests in equities and is in a higher category as the values of those investments have experienced higher rate of change in the past.

Sub-funds of the category 4 had medium volatility in the past. Volatility shows how much has the asset value per unit fluctuated upwards and downwards in the past. Considering the historical data on volatility, the sub-fund's asset units of category 4 may be exposed to medium price fluctuations. Mixed portfolio composition enables higher exposure to debt investments, which increases the credit risk.

These documents constitute the sole binding basis for the purchase of fund units. They are available free of charge in either electronic or printed form to interested parties at management company Sava Infond, družba za upravljanje, d.o.o., information and paying agents, and webpage (www.infond.si). Calculation of performance excludes initial fees (max. 5%) and redemption fees (max. 3%). Individual costs such as fees, commissions and other charges have not been included in this document and would have an adverse impact on returns if they were included. It should be noted that past performance is not a reliable indicator of the future performance of a fund. Prices of shares and the income from them may fall as well as rise and investors may not get back the amount originally invested. Information on the Risk-Reward Profile (from 1 to 7) is available on webpage www.infond.si. Further information on taxation can be found in the full sales prospectus. The units issued under this fund may only be offered for purchase or sold in jurisdictions in which such offer or sale is permitted. The investors may receive additional and more detailed information related to the operations and about the units for sub-funds at the Management company of the fund: SAVA INFOND, družba za upravljanje, d.o.o., Ulica Vita Kraigherja 5, SI-2000 Maribor, Slovenia Tel.: +386 2 229 7440, Fax: +386 2 229 7489, www.infond.si. Our languages of communication are German and English.
