Sub-funds of the category 4 were medium volatile in the past. Volatility shows how much did the asset value per unit fluctuate upwards and downwards in the past. Considering the historical data on volatility, the sub-fund's asset units of category 4 may be exposed to medium price fluctuations. Mixed portfolio composition enables higher exposure to debt investments, which increases the credit risk. In case that the issuer becomes insolvent or finds himself in economic problems it can happen that the debtor does not settle his obligations towards the sub-fund in total or in time.

Sub-funds of the category 3 had in the past low to medium volatility. Volatility shows how much did the asset value per unit fluctuate upwards and downwards in the past. Considering the historical data on volatility, the sub-fund's asset units of category 3 may be exposed to low to medium price fluctuations.

Defensive mixed portfolio composition enables higher exposure to debt investments, which increases the credit risk. In case that the issuer becomes insolvent or finds himself in economic problems it can happen that the debtor does not settle his obligations towards the sub-fund in total or in time.

The risk category was calculated using historical volatility data, based upon the methods set by European Union rules. The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile of this fund. Volatility is influenced by changes in the stock market prices, currencies and interest rates which can be affected unpredictably by diverse factors including political and economic events. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. The lowest category of risk does not mean that the investment is risk-free. On the basis of price fluctuations measured in the past, the fund has been classified in the category 6. The Fund has been classified in the category 6 as it invests in equities and is in a higher category as the values of those investments have experienced higher rate of change in the past.

Sub-funds of the category 5 had medium to high volatility in the past. Volatility shows how much has the asset value per unit fluctuated upwards and downwards in the past. Considering the historical data on volatility, the sub-fund's asset units of category 5 may be exposed to medium to high price fluctuations. Mixed portfolio composition enables higher exposure to debt investments, which increases the credit risk.

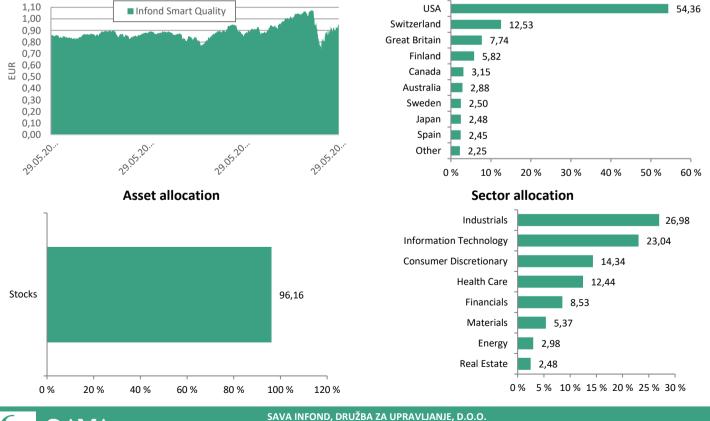

## Suitable for

The fund is suitable for investors who are willing to assume higher risk and invest over the long term.
