Synthetic Risk Reward Indicator

◀ Lower risk - Typically lower rewards ▶						
1	2	3	4	5	6	7
▶ Higher risk - Typically Higher rewards ▶						

The risk category was calculated using historical volatility data, based upon the methods set by European Union rules. The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile of this fund. Volatility is influenced by changes in the stock market prices, currencies and interest rates which can be affected unpredictably by diverse factors including political and economic events. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. The lowest category of risk does not mean that the investment is risk-free.

On the basis of price fluctuations measured in the past, the fund has been classified in the category 5. The Fund has been classified in the category 5 as it invests in equities and is in a higher category as the values of those investments have experienced a higher rate of change in the past.

Synthetic Risk Reward Indicator

The risk category was calculated using historical volatility data, based upon the methods set by EU rules. The calculation is based on historical data that cannot be used as a reliable indicator for the future risk profile of this fund. Volatility is influenced by changes in the stock market prices, currencies and int. rates which can be affected unpredictably by diverse factors including political and economic events. This risk indicator is subject to changes; the classification of the fund may change and cannot be guaranteed. The lowest category of risk does not mean that the investment is risk-free. On the basis of price fluctuations measured in the past, the fund has been classified in the category 3 as the values of those investments have experienced a low to medium rate of change in the past and its share price fluctuates comparatively little and the likelihood of both losses and gains is therefore relatively low. The fund invests a substantial portion in bonds, the value of which depends on whether the issuer is able to afford its payments. The risk of default is continuously present and can cause your investment to suffer a loss.

Synthetic Risk Reward Indicator

◀ Lower risk - Typically lower rewards ▶						
1	2	3	4	5	6	7
▶ Higher risk - Typically Higher rewards ▶						

The risk category was calculated using historical volatility data, based upon the methods set by European Union rules. The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile of this fund. Volatility is influenced by changes in the stock market prices, currencies and interest rates which can be affected unpredictably by diverse factors including political and economic events. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. The lowest category of risk does not mean that the investment is risk-free.

On the basis of price fluctuations measured in the past, the fund has been classified in the category 6. The Fund has been classified in the category 6 as it invests in equities and is in a higher category as the values of those investments have experienced a higher rate of change in the past.

Infond Umbrella Fund

Infond Money - Euro, money market subfund

Investment policy

Infond Money - Euro (the money market subfund of Infond Umbrella Funds) invests in bank deposits and money market instruments. They are suitable for shorter-term investments.

Suitable for

Investors with low risk tolerance or risk averse investors. If you are looking to store money for emergencies, save for a short-term goal, or 'park' cash from the sale of an investment, a money market fund could be for you. A typical investment in a money market fund is for 30 days to 1 year.

Synthetic Risk Reward Indicator

The risk category was calculated using historical volatility data, based upon the methods set by European Union rules. The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile of this fund. Volatility is influenced by changes in the stock market prices, currencies and interest rates which can be affected unpredictably by diverse factors including political and economic events. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. The lowest category of risk does not mean that the investment is risk-free. On the basis of price fluctuations measured in the past, the fund has been classified in the category 1. The Fund has been classified in the category 1 as the values of those investments have experienced a low rate of change in the past. The return from the fixed-income market is affected by changes in the interest-rate level. This interest-rate risk is measured with modified duration. Furthermore, the return from the fixed-income market is exposed to credit risk, which means uncertainty about the repayment ability of issuers of bonds. Credit risk can be reflected in the price of a fixed-income investment when the issuer's credit rating changes or general credit risk premiums change.

Synthetic Risk Reward Indicator

◀ Lower risk - Typically lower rewards ▶						
1	2	3	4	5	6	7
▶ Higher risk - Typically Higher rewards ▶						

The risk category was calculated using historical volatility data, based upon the methods set by European Union rules. The calculation of the risk and reward profile is based on historical data that cannot be used as a reliable indicator for the future risk profile of this fund. Volatility is influenced by changes in the stock market prices, currencies and interest rates which can be affected unpredictably by diverse factors including political and economic events. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. The lowest category of risk does not mean that the investment is risk-free.

On the basis of price fluctuations measured in the past, the fund has been classified in the category 5. The Fund has been classified in the category 5 as it invests in equities and is in a middle to high category as the values of those investments have experienced a middle to higher rate of change in the past.

The information contained in this document does not constitute investment advice and is merely a brief summary of key aspects of the fund. Full details of the fund can be found in sales prospectus, Key Investor Information Document (KIID), supplemented in each case by the most recent audited annual and half-yearly report, if this report is more recent than the most recently available annual report. These documents constitute the sole binding basis for the purchase of fund units. They are available free of charge in either electronic or printed form to interested parties at management company KBM Infond, Management Company – Nova KBM Group, information and paying agents, and webpage (www.infond.si). Calculation of performance excludes initial fees (max. 5%) and redemption fees (max. 3%). Individual costs such as fees, commissions and other charges have not been included in this document and would have an adverse impact on returns if they were included. It should be noted that past performance is not a reliable indicator of the future performance of a fund. Prices of shares and the income from them may fall as well as rise and investors may not get back the amount originally invested. Information on the Risk-Reward Profile (from 1 to 7) is available on webpage www.infond.si. Further information on taxation can be found in the full sales prospectus. The units issued under this fund may only be offered for purchase or sold in jurisdictions in which such offer or sale is permitted. The investors may receive additional and more detailed information related to the operations and about the units for sub-funds at the Management company of the fund: KBM infond, Management Company – Nova KBM Group, Ulica Vita Kraigherja 5, 2000 Maribor, Slovenia Tel.: +386 2 229 2080, Fax: +386 2 229 2796, www.infond.si.
